Audubon Area Community Services, Inc.

2022-2023 Community Needs Assessment

I. EXECUTIVE SUMMARY

A. Introduction

Audubon Area Community Services, Inc., headquartered in Owensboro, Kentucky, is a 1975 consolidation of two agencies – one based in Henderson, the other in Owensboro – both founded in 1966. In 1975, the agency served the seven-county Green River area and had approximately \$1 million in funding and sixty-five staff members. Currently the agency serves the primary, seven county Green River District, however, Audubon has some program operations in forty-two counties throughout the Commonwealth, including the services areas of Barren River, Cumberland, Pennyryle, Purchase, Lincoln Trail, and Salt River, with over \$55 million in funding and approximately 680 employees.

Audubon Area Community Services is the largest of twenty-three community action agencies serving the residents of Kentucky. Community action agencies are federally designated entities originating from President Johnson’s “War on Poverty.” As a community action agency, Audubon Area is a private, nonprofit 501(c)(3) corporation governed by a tri-partite, twenty-four-member board of directors consisting of the consumers of agency services, elected public officials, and the private sector - business people, educators or representatives of local organizations.

In addition to its designation as a community action agency under federal law, Audubon Area Community Services, Inc. is also a Special District of the Commonwealth of Kentucky under KRS 65.005, meaning it is organized for the purpose of performing governmental or other prescribed functions within limited boundaries. In order to also enhance this assessment of needs, as well as meet the requirements set forth by Section 330(k)(2) and Section 330(k)(3)(J) of the PHS Act, staff and board members of with Audubon Area Community Services, Inc. established and jointly enacted a needs assessment in conjunction with the Audubon Area Community Care Clinic, Inc., its staff, and its 13-

member independent board of directors to fully assess the social, economic, and health care determinates impacting needs of the service area landscape, as well as fully present the information for public consumption.

A Comprehensive Community Needs Assessment was conducted from July 1, 2021, through March 1, 2022, by staff of the organization in conjunction with the Community Services Block (CSBG) requirements and as a resource for AACCS, and other collaborative partners, to ascertain critical needs in the AACCS service area, as identified by community members, consumers, stakeholders, and service providers, to enable AACCS to continue adapting programs and services to best meet community needs.

A community assessment is a systematic process for creating a profile of the needs and resources of a given community or target population” (Richmond & Mooney, 2012, p. 21). In addition, our funder, the Cabinet for Health and Family Services, Department for Community Based Services, requires the agency to complete a community needs assessment annually.

Section 676(b)(11), of the CSBG Act states “...an assurance that the State will secure from each eligible entity in the State...a community action plan...that includes a community needs assessment for the community served, which may be coordinated with community needs assessments conducted for other programs...” A community needs assessment establishes a profile of a community, noting both needs as well as community resources available. In addition, Section 330(k)(2) and Section 330(k)(3)(J) of the PHS Act; and 42 CFR 51c.104(b)(2-3), 42 CFR 51c.303(k), 42 CFR 56.104(b)(2), 42 CFR 56.104(b)(4), and 42 CFR 56.303(k), requires health centers to annually review its service area of the current or proposed population at least once every three years, for the purposes of informing and improving the delivery of health center services. These factors include access to care and health care utilization; significant causes of morbidity and mortality as well as any associated health disparities; and other unique health care needs or characteristics that impact health status of health care services.

Findings from this assessment will be used to assist Audubon Area Community Services and Care Clinic to continue to deliver high quality services and promote the National Community Action Network Theory of Change Goals:

- Individuals and families with low incomes are stable and achieve economic security.
- Communities where people with low incomes live are healthy and offer economic opportunity.
- People with low incomes are engaged and active in building opportunities in communities.

The current service area has a span of seven counties which include:

Daviess County	Hancock County
Henderson County	McLean County
Ohio County	Union County
Webster County	

Audubon Area Community Services offers programming in the larger areas of Social Support Services, Early Childhood Education, Housing, Transportation, and Employment Services. Note that for purposes of services for Audubon Area Community Care Clinic, the service area includes Daviess, Hancock, Henderson, McLean, Ohio, and Union Counties specifically.

As of March 1, 2022, Audubon Area Community Services has a total of 91 worksite locations across a 46-county service area, employing 685 staff members and impacting the lives of over 47,000 Kentuckians across the Commonwealth as we uphold our mission of:

“Helping people in poverty and beyond to reach self-sufficiency by changing lives through providing services, advocacy, and partnering to strengthen communities throughout Kentucky.”

Audubon Area Community Services, Inc.’s, central office is in Owensboro, Daviess County, Kentucky at:

**Audubon Area Community Services, Inc.
1700 West Fifth Street
Owensboro, KY 42301**

Audubon Area Community Care Clinic, Inc.’s, main office is in Owensboro, Daviess County, Kentucky at:

**Audubon Area Community Services, Inc.
750 Salem Drive, Suite 2
Owensboro, KY 42303**

Map of Current Service Area

B. Methodology

Multiple sources of quantitative and qualitative data sources were utilized to develop as clear a picture as possible regarding the health, wellbeing, and self-sufficiency of our area. Quantitative data was primarily mined through the CARES Engagement Network platform, an online depository for demographic information from available standardize data resources located at <https://cap.engagementnetwork.org>. The Community Action Partnership/CARES Engagement Network utilizes sources such as the US Census Bureau (Decennial 2000 and 2010 Census; the American Community Survey 2015-2019 five year estimates), the US Department of Education, National Education Center for Educational Statistics; the US Department of Health and Human Services, Administration for Children and Families; the Department of Health and Human Services Bureau of Primary Health Care; the US Centers for Disease Control and Prevention; US Department of Transportation, US Department of Labor, Bureau of Labor Statistics; the Federal Reserve; and the US Department of Housing and Urban Development. In addition, numerous state, local and agency databases were referenced to gather a clear picture of the demographics of the service area.

Collection of qualitative data for this assessment like in the needs assessment from 2020-2021 was impacted by the SARS-CoV-2 (COVID-19) worldwide pandemic that has ravaged the country and region for over two-years. Therefore, qualitative data was primarily gathered exclusively in the

form of surveys found online that captured responses from consumers, stakeholders, employees, community leaders, faith-based representatives, elected officials, and board members of the Audubon Area Community Services in the CSBG service area. Surveys were collected between July 1, 2021, and March 1, 2022, in both written and online formats, resulting in 117 reported survey results from the service region being submitted. The survey was accessible online via Survey Monkey via the Audubon Area Community Services, Inc. website, <https://www.audubon-area.com/>, under the Community Needs Assessment link located at <https://www.surveymonkey.com/r/HFGDCZM-CNA>, and requested feedback regarding needs of the community, contributing factors to poverty, health care needs, health care access, and areas of focus for growth in programming. Actual results as broke down by county are provided later in this document.

To capture more data of needs, and to replace the scope of information obtained normally through focus groups and community forums throughout the region that were prevented due to COVID-19 preventive measures, Audubon Area Community Services reviewed information from its data management and service application system, CASTiNET, between July 1, 2020, and March 1, 2022, to review the scope of client calls and requests for services. Each time an applicant contacts Audubon Area Community Services to request assist from the agency, an application for assistance is logged by the Community Services Coordinator from each county to notate the specific need of services requested and begin processing the request. The results of service requested provides data regarding the real-time needs of the citizens of our service area in the last fiscal year.

The research, analysis, and writing of this Community Needs Assessment were performed under the direction of Brandon Harley, Deputy Chief Executive Officer of Audubon Area Community Services. Community Forum Group meetings were coordinated and conducted under the direction of Angela Ditch, Community Services Manager. Finally, survey data was gathered via a survey located at <https://www.surveymonkey.com/r/HFGDCZM-CNA>, and maintained by Community Action Kentucky (CAK), a statewide association representing and assisting the 23 community action agencies throughout the Commonwealth. A summary of the assessment area findings will begin on the next page.

Summary of Findings

Quantitative Data Summary findings from sources for aggregate service area:

- **216,083** people live in the **2,597.32** square mile report area defined for this assessment according to the US Census 2015-2019 5-year estimates, **a decrease of 4.20%** from the service region in the last year (US Census Bureau, American Community Survey. 2015-19).
- US Census Bureau, ACS (2015-19) indicates that gender breakdown for the area is **48.89%** male, and **51.11% female**.
- The racial breakdown of our service area is comprised as such **white population 90.56% of the report area, black population represented 4.91%, and other races combined were 2.09%. Persons identifying themselves as mixed race made up 2.45% of the population** (US Census Bureau, American Community Survey. 2015-19).
- There are an estimated **85,391** households in the service area (**an increase of 468 households** from last estimates), **67.84% were family households, while 32.16% were non-family households** (US Census Bureau, American Community Survey. 2015-19).
- **23.68% or 51,179** of our total population in the service area is under the age of 18, **6.29% or 13,583** is under the age of 5 years of age; and **16.46% or 35,568** is over the age of 65 years of age (US Census Bureau, American Community Survey. 2015-19).
- **17.68% or 37,170 persons in the service area population live at or below the Federal Poverty Level (FPL), and 24.77% or 12,408 of all children in the service area live at or below the FPL, while 29.6% of children under the age of 5 live under FPL; and 10.79% or 3,821 persons over age 65, live at or below FPL** (US Census Bureau, American Community Survey. 2015-19).
- Population in Poverty by Gender: **16.29% Male and 19.00% Female** (US Census Bureau, American Community Survey. 2015-19).
- Population in Poverty by Race: **16.03% White/Caucasian, 31.66% Black or African American, 36.52% Asian, 12.58% Native Hawaiian/Pacific Islander, 32.38% "Some Other Race", and 40.01% Multiple Races** (US Census Bureau, American Community Survey. 2015-19).
- Population in Poverty by Ethnicity Alone: **45.62% Hispanic/Latino, and 16.84% Not Hispanic/Latino** (US Census Bureau, American Community Survey. 2015-19).
- Family Poverty Rate by Family Type: **12.9% of all households** were living in poverty within the report area, **female headed households represented 50.3% of all households in poverty**, compared to **36.7% and 13.1% of households headed by males and married couples, respectively** (US Census Bureau, American Community Survey. 2015-19).
- **58.4% or 21,122** of the students in our services area qualify for free or reduced lunch (National Center for Education Statistics, NCES - Common Core of Data. 2018-19).
- **11.53%** of the population live in an area of the service region with low food access, more than ½ mile from a supermarket, grocery store or other food center (US Department of Agriculture, Economic Research Service, USDA - Food Access Research Atlas. 2015).
- **14.38%** of the population in the service area experiences Food Insecurity in 2017 (Feeding America. 2017).

- **12.7% or 10,847 households** of the service area population receive SNAP Benefits in 2019, while another **7,550 households with income levels below FPL were not receiving benefits** (US Census Bureau, American Community Survey. 2015-19).
- **23.37% or 19,958 households** in the service area experience a high household cost burden (housing costs exceed 30% of total household income) (US Census Bureau, American Community Survey. 2015-19).
- **0.28% or 242 units** of occupied housing in the service area are without plumbing (US Census Bureau, American Community Survey, 2015-19).
- Median household incomes in the service region per county are as follows: Daviess County \$52,620; Hancock County \$60,626; Henderson County \$53,199; McLean County \$51,184; Ohio County \$47,542; Union County \$49,870; and Webster County \$49,079. Kentucky median income is \$52,256 (US Census Bureau, Small Area Income & Poverty Estimates. 2019).
- **7.44%** of all households in the services area have no operational motor vehicle (US Census Bureau, American Community Survey. 2015-19).
- The unemployment rate in the area is at **2.8%, a decrease of 2% from last year** (US Department of Labor, Bureau of Labor Statistics. 2021 - November).
- **12.2%** of the population do not have a high school diploma (US Census Bureau, American Community Survey. 2015-19).
- **10.9%** of the population have obtained a bachelor's level degree or higher (US Census Bureau, American Community Survey. 2015-19).
- **6.07% or 13,126** individuals in the service area are uninsured (US Census Bureau, Small Area Health Insurance Estimates. 2019).
- In February 2022, **35.4% or 76,559 individuals are currently qualified for Kentucky Medicaid** in the service region, *an increase of over 2% from last FY* (Kentucky Cabinet for Health and Family Services, Division of Administration and Financial Management, Medicaid Statistics, February 2022 Monthly Membership Counts by County, <https://chfs.ky.gov/agencies/dms/dafm/Pages/statistics.aspx>).
- **48,187 persons** were received Medicare benefits in the report area, including **9,940 disabled persons** in the report area received Medicare benefits in 2019 (Centers for Medicare and Medicaid Services, CMS Geographic Variation Public Use File. 2019).
- **Access to Care** – *the next subheadings provide a snapshot of provider access in the service area*
 - ❑ **42.1 primary care physicians per 100,000 residents in the service area** compared to the KY statewide average of 65.7 physicians per 100,00 residents (US Department of Health & Human Services, Health Resources and Services Administration, Area Health Resource File. 2014).
 - ❑ **48.1 dentists per 100,00 residents in the service area** compared to KY statewide average of 61.8 per 100,000 residents (US Department of Health & Human Services, Health Resources and Services Administration, Area Health Resource File. 2015).
 - ❑ **157.7 mental health care provider rate per 100,000 residents of the service area** compared to a KY statewide average of 203.2 per 100,000 residents (University of Wisconsin Population Health Institute, County Health Rankings. 2018).
- Health Care Indicator Data – *the next subheadings provide a snapshot of health indicators for preventative issues and disease prevalence within the service area.*

- ❑ **Prevalence of Overweight (percent adults) – 69% of service area population** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Prevalence of Obesity (percent adults) – 34% of service area population** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Physically Unhealthy Days – 5 days per month** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Mentally Unhealthy Days– 5 days per month** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2015-17).
- ❑ **Prevalence of Asthma (percent adults) - 16% of service area population** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Prevalence of Diabetes (percent adults) – 16% of service area population** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Prevalence of Hypertension (percent adults) – 40% of service area population** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).
- ❑ **Flu Vaccination in the Past Year** (percent adults) – 39% of individuals in the service area (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2017-19).
- ❑ **Premature Deaths** (years lost per 100,000 of population) – 8,298 years (Kentucky Data Center. Vital Statistics, <http://www.kentuckyhealthfacts.org/data>. 2014-18).
- ❑ **Cancer Deaths per 100,000 of population by county (all types):**
 - + *Daviess – 186.8*
 - + *Hancock – 202.6*
 - + *Henderson – 193.5*
 - + *McLean – 219.6*
 - + *Ohio – 205.8*
 - + *Union – 216.1*
 - + *Webster – 189.7*

(Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18).

➤ Health Related Social Behaviors

- ❑ **Binge Drinking for Adults** (having five or more drinks on one occasion for males and having four or more drinks on one occasion for females – **16% of service area population area** (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2017-19).
- ❑ **Drug Arrests** (per 100,000 of populations) – **2,838 arrests in service area** (Kentucky State Police Annual Reports & FBI Uniform Crime Reports. <http://www.kentuckyhealthfacts.org/data>. 2018).

The Audubon Area Community Services, online survey collected a total of **117** responses during the period of July 1, 2021 through March 1, 2022, from the online and paper responses of the assessment tool located at <https://www.surveymonkey.com/r/HFGDCZM-CNA>.

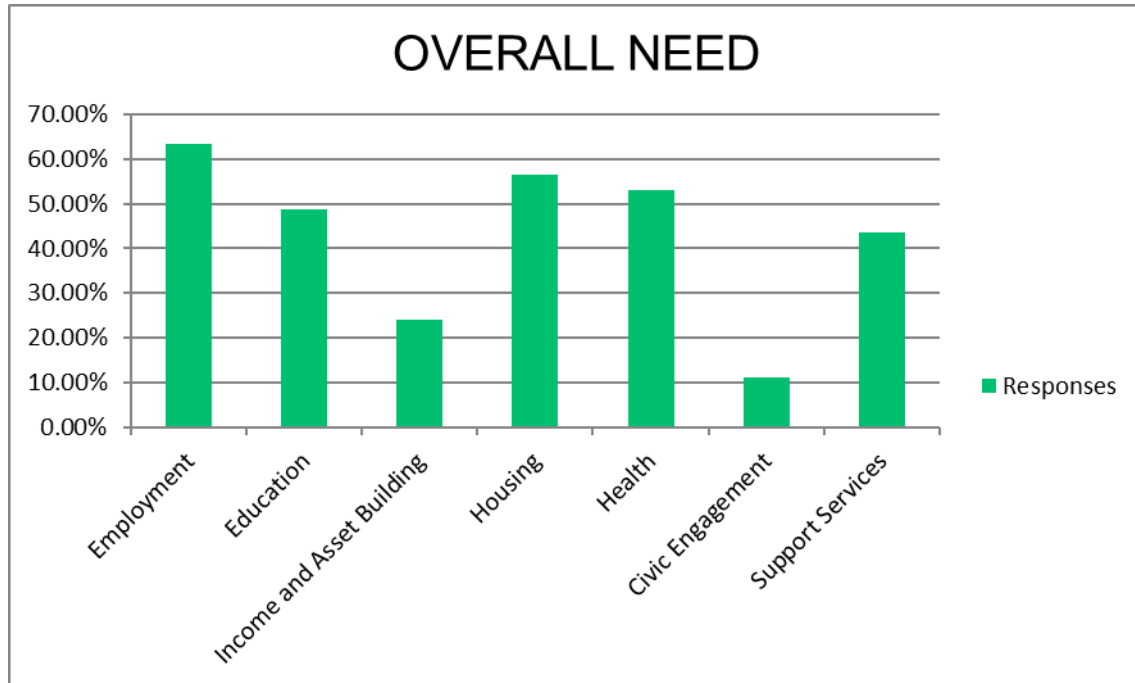

Listed below are the responses from the Audubon Area Community Services service counties:

In which county do you live or repr		
Answer Choi	Responses	
Daviess	59.83%	70
Hancock	17.95%	21
Henderson	4.27%	5
McLean	4.27%	5
Ohio	5.98%	7
Union	4.27%	5
Webster	3.42%	4
TOTAL		117

Listed below are the primary concerns that emerged from survey responses, which will be analyzed more thoroughly later in this report:

OVERALL NEED		
Answer Choices	Responses	
Employment	63.25%	74
Education	48.72%	57
Income and Asset Building	23.93%	28
Housing	56.41%	66
Health	52.99%	62
Civic Engagement	11.11%	13
Support Services	43.59%	51
	Answered	117

Responses from several survey questions combine to form an aggregate category of need. In addition, Support Services support many multiple domains including family services, case management, and emergency services (emergency food, clothing, utility assistance, and other areas of basic needs).

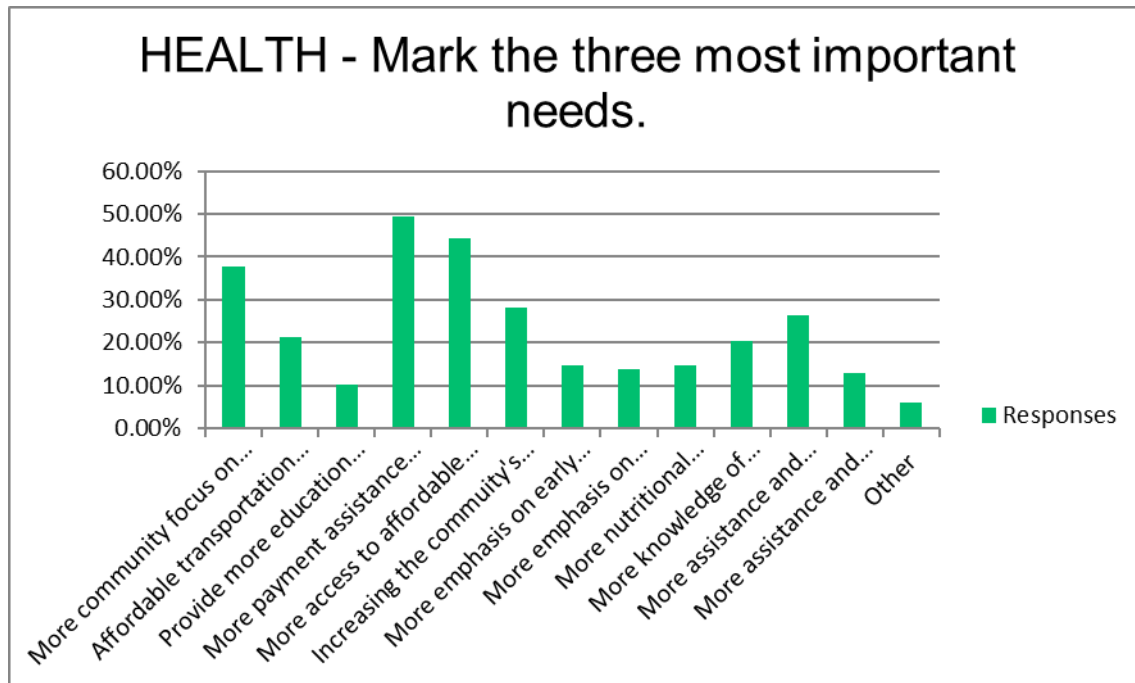

COMMUNITY HEALTH NEEDS – Qualitative Survey Results

During the 2022 Community Needs Survey update regarding the most important Health Needs of the Service Area according to community survey respondents were (top three responses):

- Payment assistance programs for adult dental, hearing and/or vision services
- Access to affordable comprehensive (or primary) health care services
- Community focus on preventative healthcare

Answer Choices	Responses	
More community focus on preventative healthcare	37.61%	44
Affordable transportation for health care services	21.37%	25
Provide more education on maintaining personal hygiene	10.26%	12
More payment assistance programs for adult dental, hearing and	49.57%	58
More access to affordable comprehensive (or primary) health ca	44.44%	52
Increasing the community's knowledge of available health resourc	28.21%	33
More emphasis on early childhood nutrition education	14.53%	17
More emphasis on reinforcing healthy eating habits	13.68%	16
More nutritional counseling (one on one and free)	14.53%	17
More knowledge of available food resources	20.51%	24
More assistance and resources for victims of domestic violence	26.50%	31
More assistance and resources for victims of elderly abuse	12.82%	15
Other	5.98%	7
Other (please specify)		7
Answered		117

Audubon Area Community Services Client Program Service Requests FY 2022

Due to the restrictions associated with COVID-19, the ability to conduct community forums in each county to gain insight into focused community needs for individual counties was not allowable. To gain more data regarding the opinions and needs of the service area to review need and direct future focus of services, Audubon Area Community Services conducted a review of service requests as documented in our data and case management system, CASTiNET, as well as reviewed service requests from programs such as GRITS Transportation, and various call logs from intake across the organization. Through this data review, qualitative interpretation of needs can be quantified to show present and emerging needs for the upcoming years. A summary of these associated program requests for SFY 2022 is notated below as well as summary numbers from the Universal Data Services Report to HRSA PFY 2022:

Organizational Service Application Requests for SFY 2022 by Service Category and Need:

Emergency Needs for Utilities (includes electrical, natural gas, bulk fuel, wastewater, Home Energy Assistance (HEA), Water/Wastewater, and Low-Income Home Energy Assistance Program (LIHEAP)): 14,884 Applications and \$4,501,645 in financial assistance

Emergency Food Assistance (includes food boxes delivered/provided): 2652 assistance requests

Income Assistance (includes financial planning/case management requests): 22

Housing/Rental Assistance (includes mortgage and lease assistance): 112

Employment Services (includes job assistance, resume work, skill training, and referral): 68

Transportation Services (includes overview of all GRITS Transportation calls for service area Region 3): 82,991 trips and 1,066,080 miles driven.

Prescription and Health Equipment Assistance (includes eyeglass assistance and direct financial assistance for prescription medicine): 40 applications and \$3,400 in financial assistance

Health Care Assistance – Payment/Insurance (includes presumptive Medicaid application requests completed/requested): 13,115

Health Care Assistance – Total Patients Served (includes new unique patients for Audubon Area Community Care Clinic): 886

Health Care Assistance for COVID-19 (includes COVID-19 tests administered Clinic FY 2022): 2,229

Health Care Assistance for Primary/Universal Health Care Services (includes family practice, laboratory, and X-ray services): 1,674

Health Care Assistance for Behavioral Health Services: 607

Health Care Assistance for Substance Abuse Services: 524

Health Care Assistance Total Clinic Visits: 2,805 (841 Virtual/Telehealth Visits)

Themes and Findings

The results of the CAN Update for FY 2022 were categorized into themes which identify needs and issues throughout the community. The key themes are:

- **Lack of Employment Opportunities:** The highest reported issue of need in the service region in five of the seven Green River region counties as Employment Needs. Specifically noted in the qualitative responses were issues around the need for higher paying jobs with benefits; competitive wages; and significant job losses since COVID-19 impacted the region. Local economies and the job market continued to stagnate, and respondents noted issues with a lack of adequate living wage employment opportunities¹ in the last fiscal year. In reviewing the responses around Employment Needs as a subcategory, respondents noted the need for “more jobs with better pay”, “Improve the workforce with readiness skills of people who are able to work”, and “Affordable childcare during work hours” as significant barriers commonly expressed. Census data revealed that the unemployment rate has continued to trend down in the service region to **2.8%** in November 2021 (US Department of Labor, Bureau of Labor Statistics. 2021 - November) indicating that many eligible individuals are currently in the workforce but may not be making adequate wages to support their households.
- **Housing:** The second highest need recorded in the service region were issues surrounding housing. Specifically, issues surrounding federal financial assistance needed to make home ownership and home rehabilitation more affordable. Also, respondents noted that programs to increase the amount of available income and senior based housing was in tremendous need in the region. Finally, in most counties, respondents noted the increase in homelessness and the need for tangible assistance for the homeless population was a growing need. Quantitative data and reflected that 23.4% of families in the service region were at a high household cost burden (expending over 25% of their monthly income toward housing costs). Also, through a review of Audubon Area Community Services assistance applications, 14,996 households sought housing or housing related assistance in the form of utility assistance through LIHEAP or a related program, or rental/mortgage assistance in the last year, a trend noting the strain of household costs and needs of the low-income in the Green River area in the last year. These assistance requests coupled with stresses from COVID-19 exposure, job loss, and slowing economic recovery are pushing affordable housing needs to an all-time high for the population in the service region.
- **Health Related Needs and Access to Primary and Preventative Care:** Respondents consistently in the services area noted a high level of health-related issues in their survey responses. Specifically, many respondents noted a need for affordable dental and hearing assistance in the last year. In a review of county health data from Kentucky Health Facts, there are 48.1 dentists per 100,000 of the population. However, if you pull Daviess County from the service region data, the number of dentists serving the population drop precipitously. Also, the need for dentists who will serve Medicaid eligible individuals in the service region is a significant need. Of

¹ <http://livingwage.mit.edu/states/21> Kentucky living wage for a full-time working adult with two children is \$35.31 per hour.

the 56 practices/dentist that are listed in the entire state of Kentucky that actively see children and accept Medicaid, only 8 are located within 3 counties of the service area (Davies (4), Henderson (3), and Union (1)

(<https://www.countyhealthrankings.org/app/kentucky/2020/measure/factors/88/datat?sort-sc-0>)). Although the Affordable Care Act (ACA) showed a positive impact in access to care issues survey results yielded a concern in locating a primary health care provider for chronic care management, and more specifically, affordable ongoing primary care providers. Many respondents appear to be turning to urgent care for ongoing health needs and emergent issues. This is a significant issue as it is noted the service area has significant issues with Diabetes, stroke prevalence rates, and lack of coordinated and impactful chronic health care management issues.

- **Child Care:** A significant issue identified in each county was the need for affordable and stable childcare providers as in the area – this area also was a subfactor in the employment issues noted earlier in this assessment. The SARS-CoV-2 (COVID-19) pandemic exacerbated significant gaps in community childcare, where significant barriers to adequate and regulated childcare already existed. At current time, the area is just now beginning the process of “re-opening” as we have moved to low-infection risk periods, but if these long-established child care issues continue, improvements in employment opportunities, as well as other impacts of the recovery process from COVID-19 may stagnate.
- **Collaboration, Communication, and Awareness:** Respondents of the indicated that the pervasive nature of our environment highlighted the need for community action agencies, nonprofit partners, health entities, and governmental programs to coordinate study, planning, and program delivery in ways to ensure all citizens benefit and receive impact in synergistic ways to achieve prime impact. This theme is not original, as it echoes themes identified in past assessments, but continues at a higher pitch in this year’s assessment. The other portion noted that the pandemic forced many new individuals and families to seek services which they were unfamiliar and lacked information on how or where to access to maximize efficiency and benefit.
- **Lack of Basic Needs:** As noted in the 2021 CNA, high levels of dependence on the social safety net and governmental programs, many operated by Audubon Area Community Services, persisted. Respondents to the needs assessment in the service area noted a high level of need for necessities like food, clothing, shelter, and other needs, which were also evidenced by the high level of requests for services from AACCS this last fiscal year. Audubon Area recorded **17,648** unique assistance applications overall last fiscal year, primarily regarding emergent utility, rental, and food assistance requests.
- **Health Care Payment Assistance:** With specific regard to community health needs of the service area significant gaps grew once again in the area locating affordable options for specialty care issues, particularly in terms of vision and dental care options for the low income of the area.

- **Overweight and Obesity Prevalence:** Inactivity and poor eating habits continued to be negatively impacting the service area as evidenced by quantitative data reviews. Overall, the region was higher than statewide averages, and in combination with high prevalence of Diabetes prevalence and other health related outcomes like stroke prevalence and hypertension, continued focus on adult weight should continue. The GRDHD needs assessments have highlighted this concern in years past.
- **Community Focus on Preventative Care:** Focus on community health issues and programming to educate and coordinate health care initiatives emerged as a significant issue of concern. Although respondents noted entities with singular focus, larger coordinated efforts to impact community health was found as a need. Educational collaborations and community coordinated efforts may help to curtail negative health impacts in the community.
- **COVID-19 Recovery:** As this CHNA is being completed, the area is approximately two-years to the day from the declaration of SARS-CoV-2 (COVID-19) as a worldwide pandemic. As of this writing, the United States has a death toll of 963,244; Kentucky has noted 14,380 deaths, and the Green River Area, has logged 789 deaths in the same period. COVID-19 has been a multifaceted tragedy that has impacted physical health, economic growth, and exacerbated social ills such as poverty level, homelessness, and hunger like no factor before. Currently, there is hope as the service area entered a low COVID-19 Community Level occurrence and many of the prior mandates and restrictions are beginning to subside. The issues impacting the population will be long felt, particularly those impacting the low-income of the service region and therefore, services and benefits to assist areas of employment, housing, health, and emergency services will remain high in the coming year.

Conclusion

The emerging themes of this assessment were not unknown. However, this collaboration of the Audubon Area Community Services and the Audubon Area Community Care Clinic, highlighted the impact and connectivity between social issues and health concerns. Better defined as social determinants of health, we come to see how the impacts of income, home, background, employment, housing, and other needs acutely define health and access to health services. This is a cascading issue that without a network of support can lead to and is associated with poor overall health, increased risk of substance abuse, and is a generational cycle that often continues without education, support, and intervention. With this joint information, these agencies will continue to shape strategic and operational plans over the next three period, directing funding and program development to impact the identified issues. Some of the key findings and resulting recommendations extend beyond the mandate and services provided by community action and community health centers and may be of value for other local organizations who share a vision of improving the health and well-being of the community.

II. CONSOLIDATED DATA OF SERVICE REGION

DEMOGRAPHIC DATA

a) POPULATION DESCRIPTION AND PROJECTED GROWTH

Total Population

A total of 216,083 people live in the 2,597.32 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. The population density for this area, estimated at 83.19 persons per square mile, is less than the national average population density of 91.93 persons per square mile.

Change in Total Population

According to the United States Census Bureau Decennial Census, between 2000 and 2019 the population in the report area grew by 8,706 persons, a change of 4.20%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Population Under Age 18

An estimated 23.68% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. An estimated total of 51,179 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered separately from other age groups.

Report Area	Total Population 2019 ACS	Population Age 0-17	Percent Population Age 0-17

b) HOUSEHOLDS AND FAMILIES

Population in Limited English Households

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A “Limited English speaking household” is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English “Very well.” This indicator is significant as it identifies households and populations that may need English-language assistance.

Report Area	Total Population Age 5+	Linguistically Isolated Population	Percent Linguistically Isolated Population
Report Location	202,500	3,374	1.6%

Data Source: US Census Bureau, American Community Survey. 2015-19. Source geography: Tract

Household Composition

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

**Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent

c) SOCIAL AND ECONOMIC STATUS OF THE SERVICE AREA

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Forego HealthCare & Unhealthy Days

Health Care Indicator	Green River	Kentucky
Less than Good Health	23%	24%
Physically Unhealthy Days	5 days	5 days
Mentally Unhealthy Days	5 days	5 days

Less than Good Health – Adults were asked to rate their health as Excellent, Good, Fair or Poor. This line reflects the percentage of adults reporting their status as generally being Fair or Poor.

Physically Unhealthy Days - Average number of days in the past 30 days when physical health, including physical illness and injury, was not good.

Mentally Unhealthy Days - Average number of days in the past 30 days when mental health, including stress, depression, and problems with emotions, was not good.

III. COUNTY SPECIFIC INFORMATION

DAVIESS COUNTY

1. BRIEF HISTORY

Daviess County, the 58th county in order of formation, was formed from a part of Ohio County in 1815. It was named in honor of Colonel Joseph Hamilton Daviess, an area landowner and lawyer killed at the Battle of Tippecanoe. The enrolling clerk misspelled the county's name, a mistake later corrected by the General Assembly, but the error continues. The residents were Confederates, and before the Civil War, more than 20 percent of the county's population was slaves. Woodworking industries thrived in heavily timbered areas until the draining of the Panther Creek bottoms in the 1920's.

Nearly half of the population lives in or near Owensboro, the county seat. Today the county is part of the Corn Belt area, where most of the country's corn is grown.

2. GEOGRAPHIC DESCRIPTION

Located completely within the Western Kentucky Coal Field, Daviess County is bordered to the north by the Ohio River, and adjoins Hancock, Ohio, McLean, and Henderson Counties. Its 463 square miles are mostly land used agriculturally.

Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

HANCOCK COUNTY

1. BRIEF HISTORY

Hancock County is the 83rd county in order of formation. It was formed on January 3, 1829, from parts of Ohio, Breckinridge, and Daviess counties and named in honor of John Hancock, president of the Continental Congress and signer of the Declaration of Independence. Early settlers farmed the land and mined coal.

The population peaked in the 1890's, when the coal and timber industries were stimulated by the crossing of the railroad through the county. Soon residents started leaving due to soil erosion, the lure of city jobs, and new coal developments elsewhere. Hancock County was transformed in the 1950's with the opening of several plants, making it one of the most industrialized rural counties in the state.

Hawesville, in the northern part of the county along the Ohio River, has been the county seat since 1829.

2. GEOGRAPHIC DESCRIPTION

Hancock County is located in the Western Coal Field region of the state along the Ohio River. It is bordered by Daviess, Ohio, and Breckinridge counties and has an area of 189 square miles.

3. LOCATION OF OFFICES

Hancock County Community Services Office
225 Main Cross Street
Hawesville, KY 42348

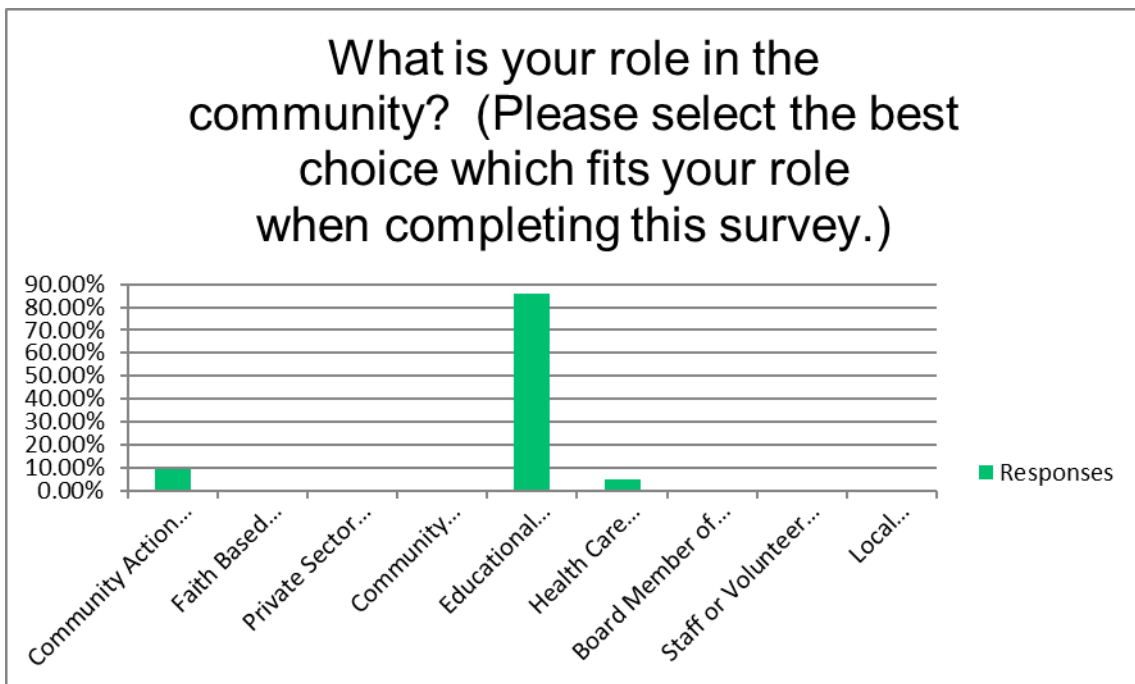

North Hancock Elementary School
330 Frank Luttrell Road
Lewisport, KY 42351

South Hancock Elementary School

Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

HENDERSON COUNTY

1. BRIEF HISTORY

Henderson County is the 38th county in order of formation. It was first settled around 1791. Settlers were initially deterred by Indians and outlaws but were eventually drawn to the area's rich farming land. In the early 1800's, the county seat, Henderson, was made an inspection point for tobacco and other products that shipped out of the region on the neighboring Ohio River. During the Civil War, the county was subjected to Confederate raids and occasional Union occupation.

In the 1930's, before the advent of interstate highways, Henderson County was a stopping point on one of the most heavily-traveled north-south roads. As a result of the tourist traffic, the John James Audubon State Park was established. The namesake county seat of Henderson sits on along the Ohio River on the northern portion of the county.

2. GEOGRAPHIC DESCRIPTION

Henderson County is located just south of the Ohio River, and also shares borders with Daviess, McLean, Webster, and Union counties. The county covers 438 square miles which range from level floodplains to gently rolling hills.

Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

MCLEAN COUNTY

1. BRIEF HISTORY

McLean County is the 103rd county in order of formation. It was named after Alney McLean, a veteran of the War of 1812, state representative and congressman. The county's varied history includes Indian attacks on the first settlers, who retreated to caves they dug in the hillside near present-day Calhoun; riverboat traffic on the Green River; several Civil War conflicts; and the dubious honor of being the home of the first United States casualty during World War I. The county seat is Calhoun.

2. GEOGRAPHIC DESCRIPTION

McLean County's 256 square miles are at the heart of the Western Coal Field Region. The county is bordered by Daviess, Ohio, Muhlenberg, Hopkins, Webster, and Henderson Counties. The Green River forms a portion of the eastern border and dissects the county.

OHIO COUNTY

1. BRIEF HISTORY

Ohio County is the 35th county in order of formation. The county was established from part of Hardin County on December 17, 1798, and was named for the Ohio River, which formed its northern boundary until Daviess County (1815) and Hancock County (1829) were created from it. Daniel Boone was one of the first explorers in the area. Early pioneers had to contend with attacking Indians, anxious to protect their long-held land. In the 1930's excavations at the Indian Knoll burial mounds yielded over 1,200 skeletons.

River traffic on the Green and Rough rivers is credited with the county's early growth. This was disrupted by the Civil War and virtually ended with the arrival of the railroad in the 1870's.

The economy is a mixture of coal mining, agriculture, and oil. The county seat is Hartford.

2. GEOGRAPHIC DESCRIPTION

Ohio County is in the Western Coal Field Region of Kentucky, surrounded by Breckinridge, Hancock, Grayson, Butler, Muhlenberg, McLean, and Daviess counties. Its square miles total 596. The county's topography is undulating and well suited for agriculture.

Mental Health Assistance

River Valley Behavioral Health Services

P.O. Box 1637, Owensboro, KY 42302-1637

(270) 689-6500

(800) 433-7291 - Crisis Line outside Daviess County

Community Mental Health Center; mental health services and referrals; 48 permanent housing beds.

The 24/7 crisis intervention, information, and referral service is provided free of charge to individuals seeking help. This service is also equipped with TDD (Device for the Deaf). Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

UNION COUNTY

1. BRIEF HISTORY

Union County is the 56th county in order of formation. It was formed from part of Henderson County on January 15, 1811, and was probably named for the unanimous agreement of its citizens to create a new county. Morganfield is the county seat. Union County was settled during the westward migration following the Revolutionary War. The county had a considerable slave population prior to the Civil War, and in 1862, Union troops took all residents of Caseyville prisoners on charges of treason. During World War II, more than 1,300 prisoners of war were interned at the Camp Breckinridge Training Center.

The county is the site of numerous Indian burial and ceremonial mounds. After the desecration of more than 1,000 graves in 1987, which prompted the Kentucky General Assembly to make such looting a class D felony, several hundred Indians conducted a reburial service.

2. GEOGRAPHIC DESCRIPTION

Union County is bordered by Henderson, Webster, and Crittenden counties, and to the west by the Ohio River. Union County covers an area of 343 square miles, ranging from level to hilly. Most of the land is used for agricultural purposes, to which it is well suited.

WEBSTER COUNTY

1. BRIEF HISTORY

Webster County is the 109th county in order of formation. The county was created on July 1, 1860, from portions of Henderson, Hopkins, and Union counties and was named for Daniel Webster, U.S.

Congressman, Senator, and Secretary of State. The county seat is Dixon.

Webster County was probably settled by Revolutionary War veteran William Jenkins. Kentucky's first battle of the Civil War, the Battle of Burnt Mill, was fought in the county.

Webster County's prosperity depends on its fertile land and natural resources. Surface mining is vital to the local economy, and 90 percent of the farming income is derived from corn and soybean production. Dixon has been the county seat since the county's creation in 1861. However, Providence is the largest community, home to almost a third of Webster County's residents.

2. GEOGRAPHIC DESCRIPTION

Webster County is surrounded by Henderson, McLean, Hopkins, Crittenden, and Union counties. Its eastern border of the Green River and its western border of the Tradewater River are divided by a ridge that runs through the middle of the county. The ridge divides the watersheds of the two rivers. Webster County's square miles total 336.

Also has many HIV prevention programs for the community including rapid testing. Clinical Satellite twice monthly in Owensboro Health Department at 1600 Breckinridge, Owensboro, KY

Mental Health Assistance

River Valley Behavioral Health Services
P.O. Box 1637, Owensboro, KY 42302-1637
(270) 689-6500

(800) 433-7291 - Crisis Line outside Daviess County

Community Mental Health Center; mental health services and referrals; 48 permanent housing beds. The 24/7 crisis intervention, information, and referral service is provided free of charge to individuals seeking help. This service is also equipped with TDD (Device for the Deaf). Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

Data Sources for Statistical Information

Please note that the following sources were utilized for demographic research regarding this report. Most of the demographic data was sourced utilizing the online platform, CARES Engagement Network, located at <https://engagementnetwork.org/assessment/>, with the actual data set run on January 6, 2022. CARES Engagement Network mines data from primary resources, such as the US Census Bureau, US Department of Health and Human Services, US Department of Labor Statistics, and other federal and state statistical databases. In addition, health data sources were sourced primarily from Kentucky Health Facts at <https://www.kentuckyhealthfacts.org>. Primary sources of data and associated websites or links are noted below.
