Audubon Area Community Services, Inc.

SFY 2026 Community Needs Assessment

I. EXECUTIVE SUMMARY

A. Introduction

Audubon Area Community Services, Inc., headquartered in Owensboro, Kentucky, is a 1975 consolidation of two agencies – one based in Henderson, the other in Owensboro – both founded in 1966. In 1975, the agency served the seven-county Green River area and had approximately \$1 million in funding and sixty-five staff members. Currently the agency serves the primary, seven county Green River District, however, Audubon has some program operations in forty-two counties throughout the Commonwealth, including the services areas of Barren River, Cumberland, Pennyrite, Purchase, Lincoln Trail, and Salt River, with over \$70 million in funding and approximately 700 employees.

Audubon Area Community Services is the largest of twenty-three community action agencies serving the residents of Kentucky. Community action agencies are federally designated entities originating from President Johnson’s “War on Poverty.” As a community action agency, Audubon Area is a private, nonprofit 501(c)(3) corporation governed by a tri-partite, twenty-four-member board of directors consisting of the consumers of agency services, elected public officials, and the private sector - business people, educators, or representatives of local organizations.

In addition to its designation as a community action agency under federal law, Audubon Area Community Services, Inc. is also a Special District of the Commonwealth of Kentucky under KRS 65.005, meaning it is organized for the purpose of performing governmental or other prescribed functions within limited boundaries. In order to also enhance this assessment of needs, as well as meet the requirements set forth by Section 330(k)(2) and Section 330(k)(3)(J) of the PHS Act, staff and board members of with Audubon Area Community Services, Inc. established and jointly enacted a needs assessment in conjunction with the Audubon Area Community Care Clinic, Inc., its staff, and its 13-member independent board of directors to fully assess the social, economic, and health care determinates impacting needs of the service area landscape, as well as fully present the information for public consumption.

A Comprehensive Community Needs Assessment was conducted from July 1, 2024, through March 15, 2025, by staff of the organization in conjunction with the Community Services Block (CSBG)

requirements and as a resource for AACS, and other collaborative partners, to ascertain critical needs in the AACS service area, as identified by community members, consumers, stakeholders, and service providers, to enable AACS to continue adapting programs and services to best meet community needs.

A community assessment is a systematic process for creating a profile of the needs and resources of a given community or target population” (Richmond & Mooney, 2012, p. 21). In addition, our funder, the Cabinet for Health and Family Services, Department for Community Based Services, requires the agency to complete a community needs assessment annually.

Section 676(b)(11), of the CSBG Act states “...an assurance that the State will secure from each eligible entity in the State...a community action plan...that includes a community needs assessment for the community served, which may be coordinated with community needs assessments conducted for other programs...” A community needs assessment establishes a profile of a community, noting both needs as well as community resources available. In addition, Section 330(k)(2) and Section 330(k)(3)(J) of the PHS Act; and 42 CFR 51c.104(b)(2-3), 42 CFR 51c.303(k), 42 CFR 56.104(b)(2), 42 CFR 56.104(b)(4), and 42 CFR 56.303(k), requires health centers to annually review its service area of the current or proposed population at least once every three years, for the purposes of informing and improving the delivery of health center services. These factors include access to care and health care utilization; significant causes of morbidity and mortality as well as any associated health disparities; and other unique health care needs or characteristics that impact health status of health care services.

Findings from this assessment will be used to assist Audubon Area Community Services and Audubon Area Community Care Clinic to continue to deliver high quality services and promote the National Community Action Network Theory of Change Goals:

- Individuals and families with low incomes are stable and achieve economic security.
- Communities where people with low incomes live are healthy and offer economic opportunity.
- People with low incomes are engaged and active in building opportunities in communities.

The current service area has a span of seven counties which include:

Daviess County	Hancock County
Henderson County	McLean County
Ohio County	Union County
Webster County	

Audubon Area Community Services offers programming in the larger areas of Community Services, Early Childhood Education, Housing, Transportation, and Employment Services. Note that for purposes of services for Audubon Area Community Care Clinic, the service area includes Daviess, Hancock, Henderson, McLean, Ohio, and Union Counties specifically.

As of March 14, 2025, Audubon Area Community Services has a total of 118 worksite locations across a 34-county service area, employing over 730 staff members and impacting the lives of over 40,000 Kentuckians across the Commonwealth as we uphold our mission of:

“Helping people in poverty and beyond to reach self-sufficiency by changing lives through providing services, advocacy, and partnering to strengthen communities throughout Kentucky.”

Audubon Area Community Services, Inc.’s, central office is in Owensboro, Daviess County, Kentucky at:

Audubon Area Community Services, Inc.
1700 West Fifth Street
Owensboro, KY 42301

Audubon Area Community Care Clinic, Inc.’s, main office is in Owensboro, Daviess County, Kentucky at:

Audubon Area Community Care Clinic, Inc.

A) 4215 Benttree Drive
Owensboro, KY 42301

B) 1620 Frederica Street
Owensboro, KY 42301

C) School based clinics in all Owensboro Public School locations as outlined below:

Cravens Elementary School
2741 Cravens Ave, Owensboro, KY 42301

Emerson Academy
1335 W 11th Street, Owensboro, KY 42301

Estes Elementary School
1675 Leitchfield Rd, Owensboro, KY 42303

Foust Elementary School
601 Foust Ave, Owensboro, KY 42301

Newton Parrish Elementary School
510 Byers Ave, Owensboro, KY 42303

Owensboro High School
1800 Frederica Street, Owensboro, KY 42301

Owensboro Innovation Academy
2631 S GRIFFITH AVENUE, Owensboro, KY 42301

Owensboro Innovation Middle School
2631 S Griffith Ave, Owensboro, KY 42301

Owensboro Middle School
1300 Booth Ave, Owensboro, KY 42301

Sutton Elementary School
2060 Lewis Lane, Owensboro, KY 42301

D) Homeless Outreach Clinic location outlined below:

Daniel Pitino Shelter
501 Walnut St, Owensboro, KY 42301

Map of Current Service Area

B. Methodology

Multiple sources of quantitative and qualitative data sources were utilized to develop as clear a picture as possible regarding the health, wellbeing, and self-sufficiency of our area. Quantitative data was primarily mined through the CARES Engagement Network platform, an online depository for demographic information from available standardize data resources located at <https://cap.engagementnetwork.org>. The Community Action Partnership/CARES Engagement Network utilizes sources such as the US Census Bureau (Decennial 2010 and 2020 Census; the American Community Survey 2018-2022, five year estimates), the US Department of Education, National Education Center for Educational Statistics; the US Department of Health and Human Services, Administration for Children and Families; the Department of Health and Human Services Bureau of Primary Health Care; the US Centers for Disease Control and Prevention; US Department of Transportation, US Department of Labor, Bureau of Labor Statistics; the Federal Reserve; and the US Department of Housing and Urban Development. In addition, many state, local and agency databases were referenced to gather a clear picture of the service area's demographics.

Qualitative data was collected in the form of surveys that captured responses from consumers, stakeholders, employees, community leaders, faith-based representatives, elected officials, and board members of the Audubon Area Community Services in the CSBG service area. Surveys were collected between July 1, 2024, and March 14, 2025, in both written and online formats, resulting in 335 reported survey results from the service region. The survey was accessible online via Survey Monkey via the Audubon Area Community Services, Inc. website,

<https://www.audubon-area.com/>, under the Community Needs Assessment link located at <https://www.surveymonkey.com/r/HFGDCZM-CNA>, and requested feedback regarding needs of the community, contributing factors to poverty, health care needs, health care access, and areas of focus for growth in programming. Actual results, as broken down by county are provided later in this document.

Additional qualitative data was also gathered through the hosting of seven community forum group meetings throughout the region beginning January 30, 2025, through March 7, 2025. A wide range of stakeholders, representatives of each county, and local Audubon Area Community Services staff were invited to attend their county forums. Guided discussions were conducted, and the verbal responses of participants were recorded and later analyzed to discern themes from participants regarding the impacts of poverty, strengths of communities, areas to improve and partners in the community to collaborate. The forums were moderated by Audubon Area staff who guided the attendees through a set of standardized questions: 1) *What are some of the greatest needs that low-income persons face in our community?* 2) *Of the needs identified, what are the top 3-5 needs?* 3) *And, finally, what top three community improvements do you think our agency, or the community should focus on?*

Below is a list of focus groups as well as where and when they were facilitated:

1. Community Forum Group 1 – Daviess County, Logsdon Community Center, January 30, 2025.
2. Community Forum Group 2 – McLean County, McLean County Extension Office, February 3, 2025.
3. Community Forum Group 3 – Hancock County, Hancock County Career Center, February 4, 2025.
4. Community Forum Group 4 – Union County, Grace Fellowship Church, February 13, 2025.
5. Community Forum Group 5 – Henderson County, Henderson County Public Library, February 21, 2025.
6. Community Forum Group 6 – Ohio County, Ohio County 4-H Extension Office, February 28, 2025.
7. Community Forum Group 7 – Webster County, Webster County Senior Center, March 7, 2025.

The research, analysis, and writing of this Community Needs Assessment were performed under the direction of Brandon Harley, Chief Executive Officer of Audubon Area Community Services; Samantha Taylor-Kaai, Chief Operations Officer; Crystal Sapp, Community Services Director; and Angela Ditch, Community Services Program Manager. Community Forum Group meetings were coordinated and conducted under the direction of Angela Ditch, Community Services Manager, and Faith Holley-Lutz, Outreach Coordinator.

Qualitative survey data was gathered via an online Survey Monkey portal survey located at <https://www.surveymonkey.com/r/32QCM9X-2024-2025CNA>, and maintained by Community Action Kentucky (CAK), a statewide association representing and assisting the 20 of the 23

community action agencies throughout the Commonwealth. The survey link was placed on the agency website landing page, social media platforms, and emailed to various constituencies throughout the year.

A summary of the assessment area findings is outlined below.

Summary of Findings

Quantitative Data Summary findings from sources for aggregate service area:

- **216,145** people live in the 2,596.96 square mile report area defined for this assessment area in the U.S. Census Bureau American Community Survey 5-year estimates. (US Census Bureau, American Community Survey. 2018-22).
- US Census Bureau, ACS (2018-22) indicates that gender breakdown for the area is **49.40% (106,777) male**, and **50.60% (109,368) female**.
- The racial breakdown of our service area is comprised as such **white population 89.02% (192,421) of the report area, black population represented 4.74% (10,241), 1.11% (2,396) Asian, 0.34% (751) Native American or Pacific Islander, some other race was 1.32% (2,853), and persons identifying themselves as multiple races made up 3.46% (7,483) of the population** (US Census Bureau, American Community Survey. 2018-22).
- Total population by ethnicity alone estimated that **3.26%** was of Hispanic or Latino population, which the remaining **96.74%** was Non-Hispanic (US Census Bureau, American Community Survey. 2018-22).
- There are an estimated **85,009** households in the service area (**an increase of 556 households in the service area** from the last estimates). **57,261 are family households while 27,748 are non-family households** (US Census Bureau, American Community Survey. 2018-22).
- **23.4% or 50,579** of our total population in the service area is under the age of 18, **5.97% or 12,912** is under the age of 5 years of age; and **17.79% or 38,445** is over the age of 65 years of age (US Census Bureau, American Community Survey. 2018-22).
- **14.83% or 31,259 persons in the service area population live at or below 100% of the Federal Poverty Level (FPL). Of those 18.80% or 9,287 are children, while 23.8% or 3,030 of children under the age of 5 live under FPL. In addition, 12.0% or 4,480 persons over age 65, live at or below FPL in the service area** (US Census Bureau, American Community Survey. 2018-22).
- Population in Poverty by Sex: **13.86% Male and 15.77% Female** (US Census Bureau, American Community Survey. 2018-22).
- Population in Poverty by Race: **13.04% White/Caucasian, 36.24% Black or African American, 9.27% Native American or Alaskan native, 22.25% Asian, 14.05% Native Hawaiian/Pacific Islander, 27.90% "Some Other Race," and 25.26% Multiple Races** (US Census Bureau, American Community Survey. 2018-22).
- Population in Poverty by Ethnicity Alone: **30.92% Hispanic/Latino, and 14.29% Not Hispanic/Latino** (US Census Bureau, American Community Survey. 2018-22).

- Household Type Poverty Rate: **15.63% of all households** were living in poverty within the report area, **female headed households represented 47.5% of all households in poverty**, compared to **41.3% of married households and 11.2% of male-headed households** (US Census Bureau, American Community Survey. 2018-22).
- **58.2% or 19,904** of the students in our services area qualify for free or reduced lunch (National Center for Education Statistics, NCES - Common Core of Data. 2022-23).
- **15.86% or 12,568 individuals** live in an area of the service region with low food access, more than 1 mile (urban) or 10 miles (rural) from a supermarket, grocery store or other food center (US Department of Agriculture, Economic Research Service, USDA - Food Access Research Atlas. 2019).
- **11.9% or 10,149 households** of the service area population receive SNAP Benefits, while another **7,698 households with income levels below FPL were not receiving benefits** (US Census Bureau, American Community Survey. 2018-22).
- **22.94% or 19,497 households** in the service area experience a high household cost burden (housing costs exceed 30% of total household income), while **10.31% or 8,765 households are severely cost burdened where housing costs exceed 50% of total household income** (US Census Bureau, American Community Survey. 2018-22).
- **23.76% or 20,199 occupied housing units with one or more substandard conditions in the service area (US Census Bureau, American Community Survey, 2018-22).**
- **2.24% or 4,865 of the total population in the service area live in group quarters** (managed housing situations including college residence halls, residential treatment centers, skilled-nursing facilities, group homes, military barracks, correctional facilities, and workers' dormitories) (US Census Bureau, Decennial Census. 2020.)
- **20.05% or 42,609 individuals** in the service area live with a physical, mental, or developmental disability (US Census Bureau, American Community Survey. 2018-22).
- **Median household incomes have all increased** in the service region since the last assessment. County median income levels are as follows: **Daviess County \$64,021; Hancock County \$68,102; Henderson County \$56,912; McLean County \$64,020; Ohio County \$52,474; Union County \$58,260; and Webster County \$55,451. Kentucky median income is \$60,183** (US Census Bureau, American Community Survey. 2018-22).
- **5,219 or 6.14%** of all households in the services area have no operational motor vehicle (US Census Bureau, American Community Survey. 2018-22).
- The unemployment rate in the area is at **5.1%, an increase of .07% % from last year** (US Department of Labor, Bureau of Labor Statistics. 2024 - October).
- **10.76%** of the population lack a high school diploma, while 37.38% have only a high school diploma, 10.42% have an associate's degree, and 20.34% of the population have obtained a bachelor's level degree or higher educational status (US Census Bureau, American Community Survey. 2018-22).
- **7.62% or 9,338 of adults** in the service area are uninsured (US Census Bureau, Small Area Health Insurance Estimates. 2022).
- **4.69%, or 2,435 children under age 18 lack health insurance coverage** (US Census Bureau, Small Area Health Insurance Estimates. 2022).
- In December 2023, **30.91% or 66,818 individuals are currently receiving Medicaid benefits** in the service region (Kentucky Cabinet for Health and Family Services, Division of Administration and Financial Management, Medicaid Statistics, January 2024, Monthly Membership Counts by County, <https://chfs.ky.gov/agencies/dms/dafm/Pages/statistics.aspx>).

- **50,198 persons** were received Medicare benefits in the report area, including **8,654 disabled persons** in the report area received Medicare benefits in 2023 (Centers for Medicare and Medicaid Services, CMS Geographic Variation Public Use File. 2023).
- **Access to Care** – *the next subheadings provide a snapshot of provider access in the service area.*
 - ❑ **78.87 primary care physicians per 100,000 residents in the service area** compared to the KY statewide average of 94.70 physicians per 100,000 residents (Centers for Medicare and Medicaid Services, CMS – National Plan and Provider Enumeration System (NPPES). November 2024).
 - ❑ **40.59 dentists per 100,00 residents in the service area** compared to KY statewide average of 58.52 per 100,000 residents (Centers for Medicare and Medicaid Services, CMS - National Plan and Provider Enumeration System (NPPES). November 2024).
 - ❑ **260.14 mental health care provider rate per 100,000 residents of the service area** compared to a KY statewide average of 318.45 per 100,000 residents (Centers for Medicare and Medicaid Services, CMS - National Plan and Provider Enumeration System (NPPES). November 2024).
 - ❑ **3.23 Federally Qualified Health Centers per 100,000 residents in the service area compared to a KY statewide average of 9.59 per 100,000 residents** (US Department of Health & Human Services, Center for Medicare & Medicaid Services, Provider of Services File. 2023).
- **Health Care Indicator Data** – *the next subheadings provide a snapshot of health indicators for preventative issues and disease prevalence within the service area.*
 - ❑ **Prevalence of Obesity (percent adults per county):**
 - ❑ Daviess - 42%
 - ❑ Hancock – 37%
 - ❑ Henderson – 38%
 - ❑ McLean – 39%
 - ❑ Ohio – 40%
 - ❑ Union – 40%
 - ❑ Webster – 40%
 - ❑ Kentucky – 41%

□ **Sexually Transmitted Infections (Number of newly diagnosed chlamydia cases per 100,000 of population)**

- Daviess – 487.1
- Hancock – 386.1
- Henderson – 516.6
- McLean – 274.7

- Ohio – 232.2
- Union – 376.6
- Webster – 195.1

(<https://www.countyhealthrankings.org/health-data/compare-counties?year=2024&compareCounties=21059%2C21183%2C21225%2C21233>)

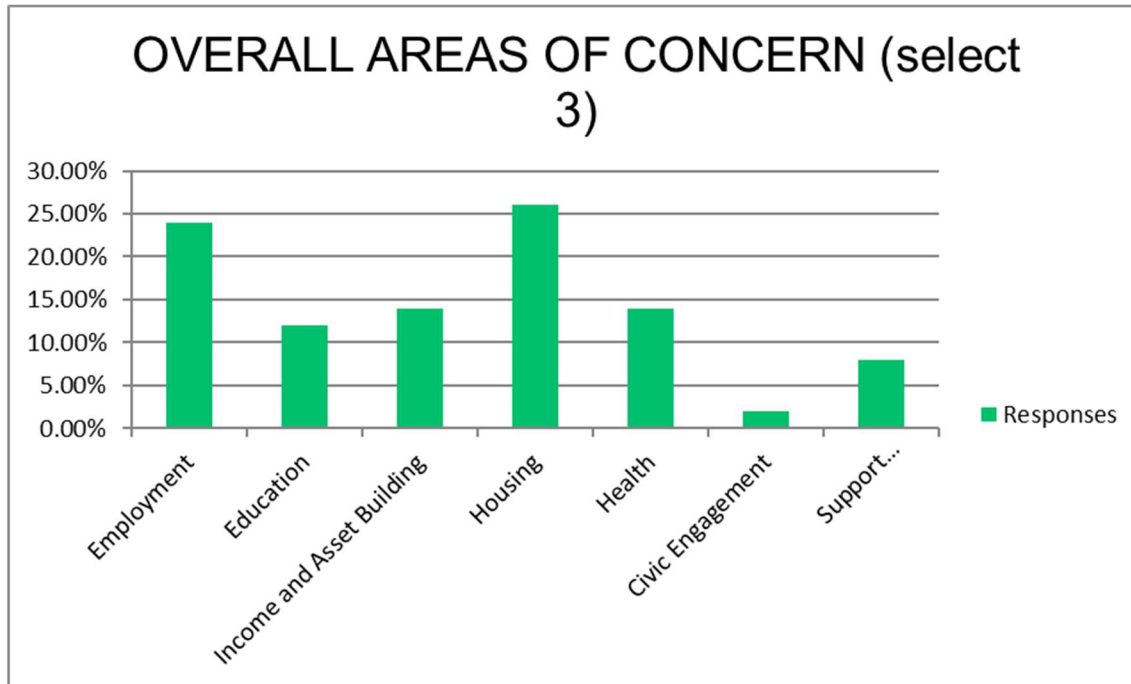

The Audubon Area Community Services, online survey collected a total of **612** responses during the period of July 1, 2024, through March 14, 2025, from the online and paper responses of the assessment tool located at <https://www.surveymonkey.com/r/32QCM9X-2024-2025CNA>.

Listed on the next page are the primary community needs, with the identified community health needs on the subsequent page that emerged from survey responses, which will be analyzed more thoroughly later in this report:

2024-2025 Community Needs Assessment		
OVERALL AREAS OF CONCERN		
Answer Choices	Responses	
Employment	24.00%	435
Education	12.00%	222
Income and Asset Building	14.00%	258
Housing	26.00%	475
Health	14.00%	252
Civic Engagement	2.00%	41
Support Services/Emergency Supports or Services	8.00%	153
	100%	612

Responses from several survey questions combine to form an aggregate category of need. In addition, Support Services support many multiple domains including family services, case management, and emergency services (emergency food, clothing, utility assistance, and other areas of basic needs).

(Data analysis continues next page).

Community Health Needs Discussion

COMMUNITY HEALTH NEEDS – Qualitative Survey Results

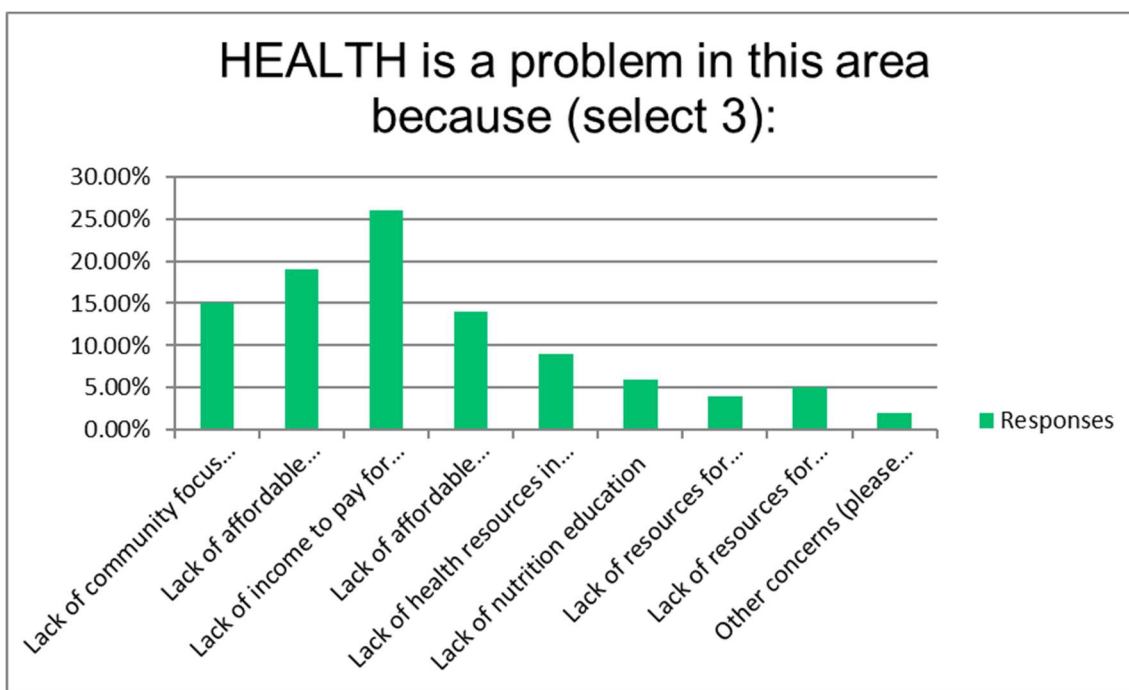

During the SFY 2026 Community Needs Survey update regarding the most important Health Needs of the Service Area according to community survey respondents were (top four responses):

- Payment assistance programs for adult dental, hearing and/or vision services
- Access to affordable comprehensive (or primary) health care services
- More community focus on preventative healthcare
- More knowledge of available food resources

2024-2025 Community Needs Assessment

HEALTH is a problem in this area because:

Answer Choices	Responses	
Lack of community focus on preventative healthcare	15.00%	267
Lack of affordable transportation for health care services, grocery	19.00%	358
Lack of income to pay for adult dental, hearing and/or vision serv	26.00%	468
Lack of affordable comprehensive (or primary) health care servic	14.00%	259
Lack of health resources in the community	9.00%	169
Lack of nutrition education	6.00%	107
Lack of resources for victims of elderly abuse	4.00%	78

Community Forum Meeting Feedback

Daviess County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing options, including rental units for low-income residents; Need of higher paying living waged ; Lack of affordable public transportation options, particularly in the rural areas of the county; Lack of affordable licensed child care providers for families; Lack of childcare and disabled adult care services; and lack of adequate mental health and substance abuse recovery services and centers.
- *Top 3 Needs Identified:* Lack of affordable housing available for citizens, particularly those with low income; jobs with higher living wages; and need for mental/dental/healthcare providers for low income and Medicaid eligible.
- *Top Three Community Improvements the Agency Should Focus On:* Need for more target advocacy work regarding the needs of the community and the low income; tax breaks for homeowners to bring vacant homes and buildings up to code and make livable; and more educational opportunities for those focused on trade and vocational careers.

Hancock County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing options for the low income; Lack of childcare providers throughout the county; Lack of dental providers and specialty health care options for Medicaid eligible patients; Need for public transportation for non-medical issues; Substance abuse and mental health treatment providers and prevention services for low income and Medicaid eligible.
- *Top 3 Needs Identified:* Lack of safe and affordable housing options; childcare and adult day care services; and the need for public transportation services in the county for non-medical trips.
- *Top Three Community Improvements the Agency Should Focus On:* Need for development and construction of duplexes/quadplexes that are income based and senior housing units; Stand-alone childcare centers open longer for shift work, particularly 2nd and 3rd shifts; and vouchers for mechanical work and rehabs for homes.

Henderson County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing options for the low income; lack of childcare for working adults and low income; Lack of access to safe and nutritious food sources and emergency food sources; lack of a family homeless shelter to house homeless families; lack of pediatric dentists to assist with low income and Medicaid eligible; lack of ability to access rehabilitation services and weatherization services for older homes; Lack of transportation for distanced medical appointments and specialty appointments out of town; Lack of living wage job options to support families in the community; Lack of Medicaid accepting dental health providers; Lack of substance used disorder treatment providers who will accepted some people with criminal histories; lack of traditional primary health care providers accepting new patients.

- *Top 3 Needs Identified:* Lack of safe and affordable housing options for the low income and transiently housed; Lack of homeless shelters for families and transitional housing settings for traditionally homeless and precariously housed in the community; and the need to know how to navigate resources.
- *Top Three Community Improvements the Agency Should Focus On:* Developing a community plan for the redevelopment of properties available for low-income housing units, and landlord tenant fairness issues; Work with city officials to devise a plan to build a family homeless shelter on the outskirts of the city limits and to form a local advocacy group to petition local government; form a coalition to write a grant to place more ky.info kiosks around the community.

McLean County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing options/units within the county; Lack of living wages jobs to support families in the county; Lack of licensed childcare options throughout the county; Lack of dental providers who will accept Medicaid patients; lack of mental health care access for Medicaid eligible patients; Lack of enough transportation options for residents; lack of access to food, especially persons living in more rural areas.
- *Top 3 Needs Identified:* Lack of transportation options for residents; Safe and affordable housing options and repair programs; lack of living wage jobs to support citizens and families to prosper.
- *Top Three Community Improvements the Agency Should Focus On:* Development of a community rideshare app that residents can use to find transportation to and from work; working with local community colleges to present information about technical education courses; forming local coalitions to address local needs.

Ohio County:

- *Greatest Needs of the low-income:* Development in the economic sector to produce more living wage jobs for Ohio County citizens in the area; Emergency and fresh food options for low income families; affordable and reliable housing and home repair options; Safe and affordable transportation services; access to substance use treatment centers; lack of food security, especially in more rural areas; need for more senior services; need for internet access in more rural areas of the county, better resource connectivity.
- *Top 3 Needs Identified:* Building safe and affordable county with more restrictions on landlords to maintain their properties; safe and affordable transportation services; and access to substance use treatment centers.
- *Top Three Community Improvements the Agency Should Focus On:* Lobby for stricter consequences to landlords who own and rent substandard housing; Form community coalitions and focus groups to discuss the needs of the community and to advocate for solutions; form a committee to grant write for more city owned vehicles.

Union County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing options for the low-income and general residents in the county; Lack of licensed traditional and nontraditional elder care options within the county; No existing homeless shelters in the county for emergency homelessness; Lack of mental health and substance abuse services; Lack of transportation services for non-medical appointments; Lack of food access in the community; Lack dental providers who accept KY Medicaid.
- *Top 3 Needs Identified:* Lack of safe and affordable single and multiunit complexes; Lack of food access in the community; and lack of dental care providers who accept KY Medicaid.
- *Top Three Community Improvements the Agency Should Focus On:* Community focused housing incentives for landlord tenant regulations, registries for landlords, regional housing partnerships with surround counties; Form a committee that can map out food banks and food deserts within the county; work with Medicaid case management services to have mobile dental clinic in the county.

Webster County:

- *Greatest Needs of the low-income:* Lack of safe and affordable housing unit for the low income; Lack of affordable transportation options for all county citizens including additional medical transportation not covered by Medicaid;; Lack of living wage employment opportunities in the county;; Assistance accessing and navigating SNAP benefits and TANF system; Need to help citizens get out of cycle of living in generational poverty; Lack of education past high school along with high number of high school drop-outs and technical training.
- *Top 3 Needs Identified:* Lack of transportation services throughout the county particularly for non-Medicaid covered individuals; Need to help citizens get out of cycle of living in generational poverty; lack of living wage employment opportunities in the county.
- *Top Three Community Improvements the Agency Should Focus On:* Coordinating a group of stakeholders to discuss transportation programming to cover non Medicaid trips; Advocate and form groups that go into after school programs, clubs, etc. to educate about budgets and finances; Work with employment agencies and local government for tax breaks to start-up businesses; find affordable ride share options and state resources to help adults needing transportation.

Themes and Findings

The results of the community needs assessment update for SFY 2026 were categorized into themes which identify needs and issues throughout the community. The key themes are:

- **Housing:** For another year, the most common theme from the quantitative and qualitative data in both survey results (<https://www.surveymonkey.com/r/HFGDCZM-CNA>) as well as noted in six of the seven county forums clearly identified housing as their most pressing or second most pressing need. Specifically affordable housing options for the low-income and fixed income citizens, including seniors and disabled. In addition, the need for family unit homeless shelters appears to be an issue in the two most populist counties of the area. This common theme from our local assessment is reflective of larger themes across the nation and throughout the Commonwealth as many areas are struggling with housing shortages, particularly for the low income. Across Kentucky, there is a shortage of 96,619 housing units in the Commonwealth at the date of this publishing for extremely low-income renters according to the National Low Income Housing Coalition, retrieved on March 19, 2025, from <https://www.nlihc.org/housing-needs-by-state/kentucky>. In addition, many of those seeking housing or barely holding their housing now are severely cost burdened, spending more than half of their income on housing. Severely cost burdened poor households are more likely than other renters to sacrifice other necessities like healthy food and healthcare to pay the rent, and to experience unstable housing situations like evictions. These factors are also reflected in the quantitative data reflecting that 22.94% or 19,497 households in the service area experience a high household cost burden (housing costs exceed 30% of total household income) and 8,765 households, or 10.31% are severely cost burdened where housing costs exceed 50% of total household income. Each of the cost-burdened data points have increased in the region since our last needs assessment publishing. In addition to the household burdened factors 23.76% or 20,199 occupied housing units with one or more substandard conditions¹ in the service area. In addition, the region has a higher population of citizens aged 65 or older, at 17.32% or 37,491 individuals, respectively. The regional senior population is higher than both state and federal averages and looks likely to continue to grow over the coming years. Local citizens responding to the survey indicated that financial assistance for rent, mortgage, and utilities is a significant need due to the costs of inflation and other monetary stressors. Forum participants verbalized a need for federal financial assistance and the need for grants to make home ownership and home rehabilitation more affordable, as well as programming to assist in combating rising utility costs that impact the stability of housing as well. Finally, in many county forum attendees noted an increase in homelessness and the need for tangible assistance for the homeless population was a growing need, including emergency housing and communal homeless shelters for each county. Currently, there are only three operational homeless shelters in the Green River region (two in Daviess County, and one in Henderson County). Audubon Area Community Services, community, and regional stakeholders, as well as elected officials and citizens need to continue to focus on and advocate for development of housing opportunities in the next

¹ 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%.

decade to help offset the trend of housing needs in the region. In addition to this assessment, the recent Community Health Needs Assessment conducted by Owensboro Health and the Green River District Health Department in 2021 (<https://www.owensborohealth.org/sites/default/files/documents/ohrh-chna-full-report-2021.pdf>)

indicated that housing was a priority needs as a significant social determinate of health (SDOH) requiring focus and funding to help impact the citizens of its service area.

- **Lack of Employment Opportunities:** The next highest area of focus as indicated by the data was about employment and related supports. This need was indicated as the highest need noted in forums conducted in McLean and Webster Counties, respectively. Specifically noted in the survey data were indicators that the region would benefit from employers of the region offering more jobs with higher pay and benefits. Also of note, the economy of the region, although growing in some cases, is still lagging compared to the pre-COVID-19 time period. Coupled with higher cost of living issues, employment themes of “better pay” and in order to working families to obtain adequate living wage employment² to thrive. In reviewing the responses around Employment Needs a significant number of respondents noted the need for “affordable childcare during work hours,” as well as “afterhours or 24-hour childcare assistance” as barriers to employment opportunities in the area. In many counties, as determined through data review and forum responses, there are many childcare deserts in the service region, and even in the larger counties of Daviess and Henderson, many transitional and long-standing childcare centers have ceased operations or decreased childcare slots. Interestingly, Census data revealed that the unemployment rate has risen slightly (currently at 5.1%) while the national average is at 3.9%, but most respondents to surveys and forums felt the economy was in worse shape than the data suggests (US Department of Labor, Bureau of Labor Statistics. –2024- October). In the end, the issue of unemployment does not appear to not be the issue, but rather the income levels of the working poor as well as the cost of living in the area. Focus should be on how to continue to grow employment opportunities that meet the economic and ancillary supportive demands, including growing childcare options to support working individuals and families throughout the region.
- **Health Related Concerns and Access to Primary, Specialty and Preventative Care:** Respondents consistently in the services area noted a high level of health-related issues in their survey responses. Specifically, many respondents continued to note the need for affordable dental and hearing assistance, particularly in the areas of dental care, optometry, and hearing services. In a review of county health data from Kentucky Health Facts, there are 40.59 dentists per 100,000 of the population, with only 46 total providers in the seven-county service area (Centers for Medicare and Medicaid Services, CMS - National Plan and Provider Enumeration System (NPPES). November 2024). In addition, local respondents indicate that very few, if any, providers accept Kentucky Medicaid due to the low reimbursement rates. In addition, there are very few providers accepting Medicare for

² <http://livingwage.mit.edu/states/21> Kentucky living wage for a full-time working adult with two children is \$441.10 per hour.

eligible participants, mostly a senior population leaving significant portions of vulnerable children, low-income, and seniors, without adequate local access to dental care and dental pain management and treatment in the region. Overwhelmingly, this lack of Medicaid dental providers was echoed in each county forum as a high-level need requiring attention from the agency, stakeholders, and community partners. Additionally, respondents from the survey indicated that locating affordable and accessible primary health care is a continued need within the region. Although the Affordable Care Act (ACA) showed a positive impact in access to care issues survey results yielded a concern in locating a primary health care provider for chronic care management, and more specifically, affordable ongoing primary care providers. Current statistics indicate that there are 78.87 primary care providers per 100,000 residents in the service region (Centers for Medicare and Medicaid Services, CMS - National Plan and Provider Enumeration System (NPPES). November 2024). This is far below state and federal indicators. Couple this with the high rates of cancer incidents between our highest reporting and lowest reporting counties (548.5 to 410.5 cases per 100,000 of the population respectively) and higher than average rates of obesity, diabetes, and hypertension, health care issues around primary and preventive care are of a high focus in the region. Many respondents appear to be turning to urgent care for ongoing health needs and emergent issues. This avenue of health care treatment is a misnomer, as acute treatment does not engage individuals with good ongoing primary health care and regular access to check-ups for early detection and treatment. By pursuing more avenues for health care prevention, education and access to primary care, focus on long-term health, fewer cardiovascular events, and longer life expectancies for the populations in this area will result.

- **Behavioral Health and Substance Use Disorder Treatment:** In addition to primary care issues, many respondents in forums, as well as survey results, indicated a higher need for behavioral health and substance use disorder treatment within the counties. This trend has been noted in prior assessments, and some positive movement in providers has occurred, there appears to be a need for continued focus on growing provider ship. Statistical data shows that the region has access to only 260.10 mental health providers per 100,000 citizens of the service area, well below the 310.97 level of the state and national levels, respectively (Centers for Medicare and Medicaid Services, CMS - National Plan and Provider Enumeration System (NPPES). November 2024). Specifically issues such as medication management for behavioral health disorders, issues of despair, and readily available substance use disorder treatment and recovery services are a critical need within the region.
- **Child Care:** A significant issue identified in each county was the need for affordable and stable childcare providers as in the area – this area also was a significant subfactor in the employment issues, as well noted highly in educational outcomes as measured as well. Although unemployment rates are at stabilized lows historically, residents of the region indicate there still is a significant barrier to accessing appropriate traditional and non-traditional licensed childcare for young working families. Multiple county participants in forums noted that there was either a total lack of safe and licensed child-care providers in counties, or in the larger counties like Daviess and Henderson, a decline in available licensed childcare providers or slots. Both Head Start access (3.86 per 10,000 children) (US Department of Health & Human Services, HRSA – Administration for Children and Families,

2024) and Pre-School Enrollment (42.81% of children aged 3-4 years old in population) (US Census Bureau, American Community Survey, 2018-2022) are both lower than state and federal outcomes for our area. Overall, many participants in the assessment process noted the need for more providers available as well as non-traditional hours of childcare for families with parents working fluctuating shift work all over the region.

- **Education:** as indicated in the childcare discussion, educational factors were another high-level issue in this year's assessment. Childcare concerns and available options were highly discussed, but other issues concerning education were noted too. Approximately 53% of respondents to the survey noted that parents should have the ability to become more involved or take additional steps to be involved in their child's education. In addition, 52.8% noted that action should be taken to increase the community's knowledge about available and affordable educational resources. Within the region, educational outcomes continue to lag statewide outcomes for high school diploma achievement (10.76% vs. 11.9% for the state) and bachelor's degree attainment (12.6% vs. 15.6% statewide). Emphasis on support and attention to early involvement could help push educational outcomes higher for the service area, thus leading to a more prosperous citizenship and better economic and health outcomes for the entire area.
- **Physical Inactivity and Obesity Prevalence:** Inactivity and poor eating habits continued to negatively impact the service area as evidenced by quantitative data reviews. Overall, the region showed that 69% of citizens of the region report as overweight, which is higher than current statewide averages (Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://www.kentuckyhealthfacts.org/data>. 2016-18). Also, 31.9% of the population have a BMI over 30.0, or are classified as obese (Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion. 2019). The leading causes of these indicators include poor food choices, inadequate access to healthy food, and inactivity of the population. Data indicates that 25.9% of adults aged 20 and over reported not leisure time physical activities to help combat these issues. This issue promoted significant health concerns such as high prevalence of diabetes, heart disease, stroke, and hypertension issues. The Owensboro Health and Green River District Health Department 2021 Community Health Needs Assessment also identified this trend as a significant health need impacting the area.
- **Community Focus on Preventative Care:** Focus on community health issues and programming to educate and coordinate health care initiatives emerged as a significant issue of concern. Although respondents noted entities with singular focus, larger coordinated efforts to impact community health was found to be a need. Educational collaborations and community coordinated efforts may help to curtail negative health impacts in the community. It is notable to mention that 4 out of the 7 AACS regions expressed concerns revolving around transportation. A lack of transportation makes it difficult for those living in the more rural areas to access healthcare facilities for needed services, further affecting quality of life.

Conclusion

The emerging themes of this assessment were known. However, this collaboration of the Audubon Area Community Services and the Audubon Area Community Care Clinic highlighted the impact and connectivity between social issues and health concerns. Better defined as social determinants of health, we come to see how the impacts of income, home, community, employment, housing, and other needs acutely define health and access to health services. These issues are not born in a vacuum, and many times are interdependent and impactful of one another.

In conclusion, the findings from the community needs assessment for SFY 2026 underscore the ongoing and pressing challenges faced by our region, particularly in areas related to housing, employment, health care, childcare, education, and behavioral health. These issues are not isolated but are deeply interconnected, illustrating the broader concept of social determinants of health, where factors such as income, housing, and employment directly influence the well-being of individuals and communities. As we reflect on the data collected, it becomes clear that the need for affordable housing remains one of the most significant concerns across the region, with a growing shortage of affordable options for low-income, senior, and disabled populations. Additionally, the need for increased employment opportunities, affordable childcare, access to primary and preventive health care, and expanded behavioral health services is critical to addressing the root causes of many of the challenges faced by residents.

The assessment also highlights the urgent need for systemic change, with an emphasis on collaborative efforts from community stakeholders, agencies, and local leaders. The importance of addressing these needs in a comprehensive manner, through strategic and operational plans, cannot be overstated. As we move forward, this updated assessment will serve as a roadmap for the Audubon Area Community Services and the Audubon Area Community Care Clinic, guiding our efforts to secure funding, develop new programs, and advocate for policies that directly address the needs identified. Furthermore, the findings of this assessment should also serve as a call to action for other local organizations and partners to work together to create a healthier, more sustainable community for all residents. The interconnected nature of these issues means that solutions must be multifaceted and collaborative to truly improve the lives of those in our region.

II. CONSOLIDATED DATA OF SERVICE REGION

DEMOGRAPHIC DATA

a) POPULATION DESCRIPTION AND PROJECTED GROWTH

Total Population

A total of 216,083 people live in the 2,597.32 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. The population density for this area, estimated at 83.19 persons per square mile, is less than the national average population density of 91.93 persons per square mile.

Report Area	Total Population	Total Land Area	Population Density (Per Square Mile)
Report Location	216,463	2,597.09	83
Daviess County, KY	102,488	458.39	224

Change in Total Population

According to the United States Census Bureau Decennial Census, between 2010 and 2020 the population in the report area grew by 3,337 persons, a change of 1.56%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Report Area	Total Population, 2010 Census	Total Population, 2020 Census	Total Population Change, 2010-2020 Census	Percent Population Change, 2010-2020 Census/ACS

Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. The report area has a total population of 212,709 for whom disability status has been determined, of which 40,994 or 19.27% have any disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

Report Area	Total Population (For Whom Disability Status Is Determined)	Population with a Disability	Population with a Disability, Percent
Report Location	212,709	40,994	19.27%
Daviess County, KY	100,665	16,028	15.92%

Kentucky	4,416,344	768,360	17.40%
United States	324,818,565	41,055,492	12.64%

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, American Community Survey. 2017-21.

b) HOUSEHOLDS AND FAMILIES

Household Composition

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

**Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

Report Area	Total Households	Total Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent
Report Location	84,443	56,606	67.03%	27,837	32.97%

c) SOCIAL AND ECONOMIC STATUS OF THE SERVICE AREA

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Poverty - Population Below 100% FPL

Within the report area 15.32% or 32,308 individuals for whom poverty status is determined are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population in Poverty	Percent Population in Poverty

Housing - Housing Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs.

Report Area	Total Households	Cost-Burdened Households	Cost-Burdened Households, Percent

Adult Literacy – Level 1 Literacy Percentage

Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task but might have difficulty understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

Forego HealthCare & Unhealthy Days

Health Care Indicator	Green River	Kentucky
Less than Good Health	23%	24%
Physically Unhealthy Days	5 days	5 days
Mentally Unhealthy Days	5 days	5 days

Less than Good Health – Adults were asked to rate their health as Excellent, Good, Fair or Poor. This line reflects the percentage of adults reporting their status as generally being Fair or Poor.

Physically Unhealthy Days - Average number of days in the past 30 days when physical health, including physical illness and injury, was not good.

Mentally Unhealthy Days - Average number of days in the past 30 days when mental health, including stress, depression, and problems with emotions, was not good.

Data Source: Centers for Disease Control and Prevention (CDC) and Kentucky Department for Public Health. Behavioral Risk Factor Surveillance System Data. <http://kentuckyhealthfacts.org/data>. 2017-19.

Federally Qualified Health Centers

Report Area	Total Population	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000 Population
Report Location	216,809	7	3.23
Daviess County	103,312	2	1.94
Hancock County	9,095	0	0
Henderson County	44,793	1	2.23
McLean County	9,152	1	10.93
Ohio County	23,772	0	0
Union County	13,668	1	7.32
Webster County	13,017	2	15.36

III. COUNTY SPECIFIC INFORMATION

DAVIESS COUNTY

1. BRIEF HISTORY

Daviess County, the 58th county in order of formation, was formed from a part of Ohio County in 1815. It was named in honor of Colonel Joseph Hamilton Daviess, an area landowner and lawyer killed at the Battle of Tippecanoe. The enrolling clerk misspelled the county's name, a mistake later corrected by the General Assembly, but the error continues. The residents were Confederates, and before the Civil War, more than 20 percent of the county's population were slaves. Woodworking industries thrived in heavily timbered areas until the draining of the Panther Creek bottoms in the 1920's.

Approximately half of the population lives in or near Owensboro, the county seat. Today the county is part of the Corn Belt area of the country, where most of the country's supply of feeder corn is grown.

2. GEOGRAPHIC DESCRIPTION

Located completely within the Western Kentucky Coal Field, Daviess County is bordered to the north by the Ohio River, and adjoins Hancock, Ohio, McLean, and Henderson Counties. Its 463 square miles are mostly land used agriculturally.

HANCOCK COUNTY

1. BRIEF HISTORY

Hancock County is the 83rd county in order of formation. It was formed on January 3, 1829, from parts of Ohio, Breckinridge, and Daviess counties and named in honor of John Hancock, president of the Continental Congress and signer of the Declaration of Independence. Early settlers farmed the land and mined coal.

The population peaked in the 1890's, when the coal and timber industries were stimulated by the crossing of the railroad through the county. Soon residents started leaving due to soil erosion, the lure of city jobs, and new coal developments elsewhere. Hancock County was transformed in the 1950's with the opening of several plants, making it one of the most industrialized rural counties in the state.

Hawesville, in the northern part of the county along the Ohio River, has been the county seat since 1829.

2. GEOGRAPHIC DESCRIPTION

Hancock County is located in the Western Coal Field region of the state along the Ohio River. It is bordered by Daviess, Ohio, and Breckinridge counties and has an area of 189 square miles.

3. LOCATION OF OFFICES

Hancock County Community Services Office

Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

HENDERSON COUNTY

1. BRIEF HISTORY

Henderson County is the 38th county in order of formation. It was first settled around 1791. Settlers were initially deterred by Indians and outlaws but were eventually drawn to the area's rich farming land. In the early 1800's, the county seat, Henderson, was an inspection point for tobacco and other products that were shipped out of the region on the neighboring Ohio River. During the Civil War, the county was subjected to Confederate raids and occasional Union occupation.

In the 1930's, before the advent of interstate highways, Henderson County was a stopping point on one of the most heavily-traveled north-south roads. As a result of the tourist traffic, the John James Audubon State Park was established. The namesake county seat of Henderson sits along the Ohio River on the northern portion of the county.

2. GEOGRAPHIC DESCRIPTION

Henderson County is located just south of the Ohio River, and also shares borders with Daviess, McLean, Webster, and Union counties. The county covers 438 square miles which range from level floodplains to gently rolling hills.

Community Mental Health Center; mental health services and referrals; 48 permanent housing beds. The 24/7 crisis intervention, information, and referral service is provided free of charge to individuals seeking help. This service is also equipped with TDD (Device

for the Deaf). Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

MCLEAN COUNTY

1. BRIEF HISTORY

McLean County is the 103rd county in order of formation. It was named after Alney McLean, a veteran of the War of 1812, state representative and congressman. The county's varied history includes Indian attacks on the first settlers, who retreated to caves they dug in the hillside near present-day Calhoun; riverboat traffic on the Green River; several Civil War conflicts; and the dubious honor of being the home of the first United States casualty during World War I. The county seat is Calhoun.

2. GEOGRAPHIC DESCRIPTION

McLean County's 256 square miles are at the heart of the Western Coal Field Region. The county is bordered by Daviess, Ohio, Muhlenberg, Hopkins, Webster, and Henderson Counties. The Green River forms a portion of the eastern border and dissects the county.

OHIO COUNTY

1. BRIEF HISTORY

Ohio County is the 35th county in order of formation. The county was established from part of Hardin County on December 17, 1798, and was named for the Ohio River, which formed its northern boundary until Daviess County (1815) and Hancock County (1829) were created from it. Daniel Boone was one of the first explorers in the area. Early pioneers had to contend with attacking Indians, anxious to protect their long-held land. In the 1930's excavations at the Indian Knoll burial mounds yielded over 1,200 skeletons.

River traffic on the Green and Rough rivers is credited with the county's early growth. This was disrupted by the Civil War and virtually ended with the arrival of the railroad in the 1870's.

The economy is a mixture of coal mining, agriculture, and oil. The county seat is Hartford.

2. GEOGRAPHIC DESCRIPTION

Ohio County is in the Western Coal Field Region of Kentucky, surrounded by Breckinridge, Hancock, Grayson, Butler, Muhlenberg, McLean, and Daviess counties. Its square miles total 596. The county's topography is undulating and well suited for agriculture.

(800) 433-7291 - Crisis Line outside Daviess County

Community Mental Health Center; mental health services and referrals; 48 permanent housing beds. The 24/7 crisis intervention, information, and referral service is provided free of charge to individuals seeking help. This service is also equipped with TDD (Device for the Deaf). Callers may remain anonymous and receive help from trained telephone counselors. The guiding principle is that crisis intervention will prevent the development of more serious problems.

UNION COUNTY

1. BRIEF HISTORY

Union County is the 56th county in order of formation. It was formed from part of Henderson County on January 15, 1811, and was probably named for the unanimous agreement of its citizens to create a new county. Morganfield is the county seat. Union County was settled during the westward migration following the Revolutionary War. The county had a considerable slave population prior to the Civil War, and in 1862, Union troops took all residents of Caseyville prisoners on charges of treason. During World War II, more than 1,300 prisoners of war were interned at the Camp Breckinridge Training Center.

The county is the site of numerous Indian burial and ceremonial mounds. After the desecration of more than 1,000 graves in 1987, which prompted the Kentucky General Assembly to make such looting a class D felony, several hundred Indians conducted a reburial service.

2. GEOGRAPHIC DESCRIPTION

Union County is bordered by Henderson, Webster, and Crittenden counties, and to the west by the Ohio River. Union County covers an area of 343 square miles, ranging from level to hilly. Most of the land is used for agricultural purposes, to which it is well suited.

Community Mental Health Center; mental health services and referrals; 48 permanent housing beds. The 24/7 crisis intervention, information, and referral service is provided free of charge to individuals seeking help.

WEBSTER COUNTY

1. BRIEF HISTORY

Webster County is the 109th county in order of formation. The county was created on July 1, 1860, from portions of Henderson, Hopkins, and Union counties and was named for Daniel Webster, U.S. Congressman, Senator, and Secretary of State. The county seat is Dixon.

Webster County was probably settled by Revolutionary War veteran William Jenkins. Kentucky's first battle of the Civil War, the Battle of Burnt Mill, was fought in the county.

Webster County's prosperity depends on its fertile land and natural resources. Surface mining is vital to the local economy, and 90 percent of the farming income is derived from corn and soybean production. Dixon has been the county seat since the county's creation in 1861. However, Providence is the largest community, home to almost a third of Webster County's residents.

2. GEOGRAPHIC DESCRIPTION

Webster County is surrounded by Henderson, McLean, Hopkins, Crittenden, and Union counties. Its eastern border of the Green River and its western border of the Tradewater River are divided by a ridge that runs through the middle of the county. The ridge divides the watersheds of the two rivers. Webster County's square miles total 336.
